峠
Mountain Pass

Where is this?

Who is this?

On the Hakone Mountain pass, the sasa grass is deep.

A little bit of a breather

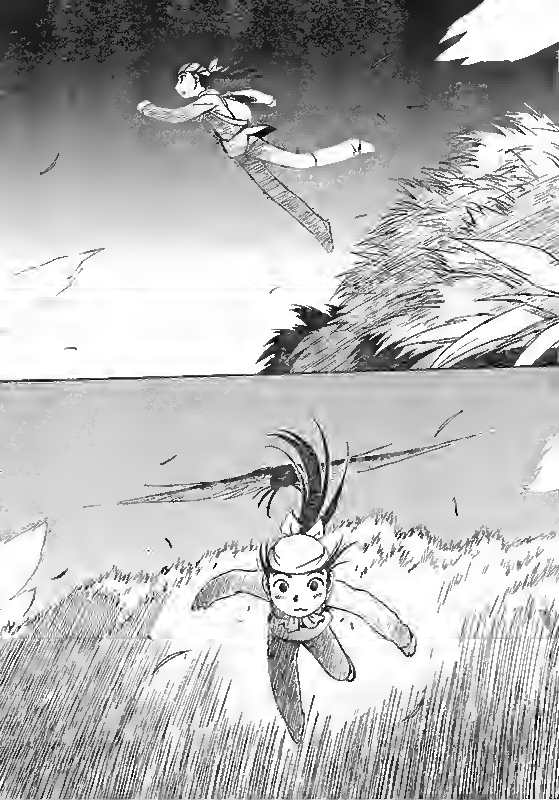
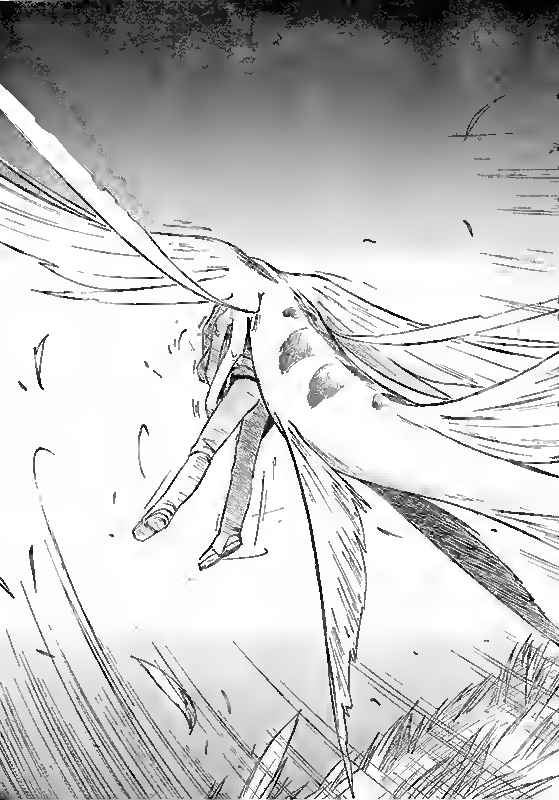
When coming to Azuma* normally you take the Koushuu Way up north
As the valleys are deep and the hills steep crossing Hakone Meuntain on foot is dangerous
While you can still glimpse the old road in between the valleys, it no longer goes anywhere.
I guess only trekkers searching for hidden natural hot springs would come to a mountain like this

*Azuma is the 'Eastern Country'

The Azuma area is curently only used by people passing through to Michinoku*.
So the only reason to take this treacherous old route
is because all the way up ahead on the very eastern edge there should be that lone shop that I've always heard about
Shall we go?

*Michinoku is the 'Northern Country'





Mmm, I wonder if we can make it up to the Odawara area in one shot.
